## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to parsing, classified in class 704, subclass 4.
- II. Claims 18-35, drawn to indexing, classified in class 707, subclass 5.
- III. Claims 36-61, drawn to transforming a grammar/flattening a grammar, classified in class 704, subclass 9.
- IV. Claims 62-79, drawn to assemble, classified in class 704, subclass 10.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I, Group II, Group III and Group IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because parsing can be performed without combination of indexing, transforming or flattening a grammar and assembling. The subcombination has separate utility such as indexing, transforming or flattening a grammar and assembling.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, Group III and Group IV, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Joseph R. Kelly (Reg. No. 34,847) on June 25, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
